

MACOINEL
İNŞAAT A.Ş.

INFRASTRUCTURE · CONSTRUCTION · FIELD OPERATIONS

Reliable Infrastructure *Solutions in* Emerging Markets

Engineering-oriented, applicable solutions in road construction, excavation, concrete-asphalt and field logistics across Türkiye, Africa and the Middle East.

MAchinery | **CO**nstruction | **IN**frastructure | **E**lectrical

01 ABOUT US

An engineering-oriented infrastructure company

MACOİNEL A.Ş. was established in Ankara, Türkiye in 2022 as a Türkiye-based construction and infrastructure company focused on infrastructure works, road construction, excavation, concrete and asphalt applications, and field logistics.

Through its engineering-oriented approach, field organization capability and flexible working model, the company aims to provide reliable solutions for infrastructure projects in Türkiye, Africa, the Middle East and emerging markets.

TARGET MARKETS — FOCUSED ON AFRICA AND EMERGING MARKETS

MACOİNEL A.Ş. aims to develop construction and infrastructure solutions in Africa, the Middle East, Türkiye and other emerging regions where reliable road, infrastructure, drainage, site preparation and logistics capacity is needed.

COMPANY INFORMATION

COMPANY NAME

MACOİNEL A.Ş.

ESTABLISHED

2022

HEAD OFFICE

Ankara, Türkiye

FIELD OF ACTIVITY

Construction, infrastructure, road works, excavation, concrete, asphalt and field logistics

TARGET REGIONS

Türkiye, Africa, the Middle East and emerging markets

2022

Year established — based in Ankara

5 areas

Road, infrastructure, excavation, concrete-asphalt, logistics

3 regions

Focused on Türkiye, Africa and the Middle East

02 OUR SERVICES

From site to delivery, integrated infrastructure services

We provide single-source solutions at every stage of the project lifecycle – from excavation to paving, from drainage to logistics coordination.

01

Road Construction

Comprehensive road construction solutions for urban roads, rural connection roads, site roads and transportation infrastructure.

02

Infrastructure Projects

Infrastructure works including drainage systems, sewerage lines, stormwater systems, culverts and basic urban infrastructure.

03

Excavation & Filling

Excavation, filling, grading, land preparation and earthwork operations for construction and infrastructure sites.

04

Concrete & Asphalt

Concrete field applications, asphalt paving and surface works for durable infrastructure solutions.

05

Field Logistics

Coordination of machinery, workforce, materials, supply processes and site operations according to project needs.

03 WHY MACOİNEL?

Four core values that set us apart

01

Engineering-Oriented Approach

Technical planning, disciplined execution and rigorous field control in infrastructure and construction processes.

02

Field Operation Capability

Organized, systematic field management for challenging site conditions and different project environments.

03

Flexible Project Structure

An adaptable working model for different countries, climates, regulations and site conditions.

04

Reliable Coordination

Coordinated and transparent management of equipment, materials, workforce and supply processes.

EQUIPMENT & FIELD CAPACITY

Flexible Resource Model

MACOİNEL A.Ş. works with a flexible equipment, workforce and subcontractor network according to project requirements.

Scalable Structure

This structure allows the company to adapt to different project scales, field conditions and regional needs.

04 THE FOUR FOUNDATIONS OF MACOİNEL

The capabilities behind our name

MA·CO·IN·EL

MA Machinery

Machinery, mechanical strength and field equipment capacity for construction operations.

CO Construction

Contracting, execution and construction discipline.

IN Infrastructure

Roads, drainage, sewerage, water lines and essential infrastructure systems.

EL Electrical

Energy, lighting and electrical field solutions.

AFRICA-ORIENTED PROJECT APPROACH

Infrastructure projects in Africa and emerging regions require more than construction capability; they also require logistics, coordination, adaptability and strong field discipline.

MACOİNEL A.Ş. focuses on creating practical and applicable solutions in regions where *road access, infrastructure development, drainage, site preparation and material coordination* are critical.

”
